***“Our customers have an immediate demand for their fuel quality and we listened. Providing the first mobile fuel lab. to cover a huge void in the marketplace. With the changes in the petroleum industry we saw this as a necessary service option for our customers” -Jonathan Drew, President of Drew Fuel Services, Inc.***

**Mobile Lab Service:**

**\$149.99 Fuel Testing**

**Gasoline /Diesel Tests Include:**

- Ethanol Content
- Octane
- Water & Sediment
- Appearance
- Flash Point
- Microbial Growth
- Cetane Index
- Report available @iTankProfile.com

*\*\$50.00 additional fee for RUSH Service*

**Compliance** The State of Florida conducted 223,885 petroleum inspections, issued 744 Stop Sale Orders, and prevented the sale of over 3M gallons of fuel. Under FL Statues, CH 525 the state can do the following: Issue a warning letter, impose a fine (\$1000.00 - \$5000.00 per violation), issue a stop-sale, revoke stations registration and licenses to do business, and for extreme cases file a lawsuit on behalf of consumer interest. ***We understand your daily stress we can help.***

**Cost Savings** Ethanol Blends absorb 40-50 times more water compared to recreational fuel. Only 2-3 teaspoons of water will cause phase separation in E-10. Removing ethanol and water from tank bottoms will cause octane to drop 2-3 times. As water build in the tank it causes more and more damage every time a fuel drop is done. We found the most pastes do not distinguish between water and phase separation. **Our preliminary reports expect a savings in the amount of contaminated fuel disposed**

**Peace of Mind** All tests are conducted to ASTM standards and we use are the same instruments that are currently used by state inspectors. All tests are conducted on premises, a detailed report is provided on Fuel Quality, and Actions Steps are provided. **We know fuel and rest assured when we leave your facility you will be confident that you are selling the best available product**

**Increase Sales** Word travels fast on who is selling great quality fuel. Your customers' vehicles demand it. We provide a certificate of Fuel Quality at each site illustrating the gas station has exceeded all regulatory standards.

**iTank Profile** is your stations **Fuel Quality Reports available on our website** to review and print your monthly reports. Every service will have results and information for you to review and keep track. In the event you have any issues with supplier or state compliance issues your iTankProfile is ideal backup for compliance and regulations.
